

RCV 1000/3

Switching amplifier with 3 A output current

Concept:

The switching amplifier **RCV 1000/3** is specially designed for the use with Piezocomposite Actuators or other capacitive loads with at least **0.6 µF** capacitance.

Specials:

The switching amplifier **RCV 1000/3** operates as an amplifier with energy recovery. This amplifier principle is especially suited to control high power during dynamic operation. An actuator-amplifier-system of this kind is more efficient than one with an analog amplifier.
